

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Ashland

Our water system violated drinking water requirements over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During July 2012 we did not complete all monitoring for Chlorine, therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the requirements we did not test for during July 2012, how often we're supposed to sample for Chlorine, how many samples we are supposed to take, how many samples we took, when samples should've been taken.

Contaminant	Required Sampling	Number of samples taken	When samples should've been taken	When samples were taken
Chlorine	daily	218	230	see below

What is being done?

There were 3 days in July 2012 where no distribution samples were taken. At least 2 distribution samples are taken daily to meet this requirement. An additional violation occurred on this requirement as it was not correctly reported to the public and to the Division of Water.

For more information please contact the Ashland Water Plant at 606-327-2058.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Ashland Water System KY0100011.
